

# The Carbon Chronicle

VOLUME 9; NUMBER 10

CARBON, ALBERTA, THURSDAY, APRIL 9, 1931

\$2.00 A YEAR IN ADVANCE

## MAIL SERVICE TO BE TRI-WEEKLY

Commencing on Monday, April 13th, Carbon will only have mail service three times a week and this arrangement will hold good for some time at least, according to officials of the Canadian National Railway system.

As far as can be learned this will be about the worst mail service that the citizens of the Village of Carbon have ever experienced, the mail having arrived daily except Sunday up to the present time.

With the new C.N.R. schedule, which affects the mail for Carbon on account of the mail connections with Grainger by stage, the train will leave Edmonton each Monday, Wednesday and Friday and returning will leave Calgary on Tuesday, Thursday and Saturday, at the same time as at present. This means that the mail will arrive in Carbon on Tuesdays, Thursdays and Saturdays at the usual time, but with the heavy mail on these days, it is expected that the Post Office wicket will not be open as early as has been the case in the past.

The train service in many parts of Alberta has been cut similar to the reduction on the Calgary Edmonton line, this being part of the economy plan of the Canadian National Railways, we are told. Traffic and freight has been greatly reduced the past few months and the train service has been cut accordingly.

## SEED GRAIN WILL BE FREIGHT FREE

Provision of seed grain for farmers requiring it for their 1931 crop will become effective at once, following the plans outlined in the legislature last week, according to an announcement made by the provincial department of agriculture. This grain will be shipped free to farmers in an area comprising some 30 municipalities in the central and eastern part of the province and a few other isolated localities south of the Red Deer river.

Carlot shipments will be moved free, one-half the freight cost being borne by the provincial, and the other half by the federal department of agriculture. Only No. 1 and No. 2 seed will be handled in this way. All such grain will be inspected free of charge by the Dominion seed branch, Calgary.

Applications for this grain should be made to the Department of Agriculture at Edmonton on forms provided for the purpose through municipal district offices.

After thorough investigation the federal government has learned that during the past year it has cost the Dominion \$37 to send a letter by air mail. The sender pays 5c for this service.

## SWALWELL DRAMATIC SOCIETY TO PRESENT PLAY

The Swalwell Dramatic Society will present the play, "No Account David" in the Elks' Hall, Carbon, Alberta, on Wednesday evening, April 15th. This play is a three-act comedy drama and has been successfully staged in Swalwell and Acme this winter and the cast come to Carbon well prepared to give the people their money's worth of entertainment.

This play is being staged under the auspices of the Anglican Church of Carbon and full arrangements are in their hands.

The curtain rises at 8:30 p.m. sharp.

## TO MY CREDITORS

Gentlemen:

I wish to inform you that the present shattered condition of my bank account makes it impossible for me to send you a cheque in response to your request.

My present financial condition is due to the Federal Laws, State Laws, County Laws, Corporation Laws, By-laws, Brother-in-laws, unsuspecting public. Through the various laws, I have been held down, held up, walked on, sat upon, flattened out and squeezed until I do not know where I am, what I am or why I am.

These Laws compel me to pay a merchant tax, capital stock tax, excess tax, income tax, real estate tax, auto tax, gas tax, light tax, cigar tax, street tax, school tax, syntax and carpet taxes.

In addition to these taxes, I am requested and required to contribute to every society and organization that the inventive mind of man can organize. To the Society of John the Baptist, Woman relief, the Navy Relief, the Children's Home, the Policemen's Benefit, the Moron's Society, the Y.M.C.A., the Boy Scouts, the Jewish Relief, the Near East, the Gold Diggers' Home, also every charitable institution in town, the Red Cross, the Black Cross, the Purple Cross and the Double Cross.

The Government has so governed my business that I do not know who owns it. I am suspected, inspected, disrespected, examined, re-examined, informed, required, commanded and compelled until all I know is that I am supposed to provide an inexhaustible supply of money for every known need, desire or hope of the human race and because I refuse to donate to all and go out and beg, borrow and steal money to give away, I am cursed and discussed, boycotted, talked to, talked about, lied to, lied about, held up, held down and robbed, until I am nearly ruined, so the only reason I am clinging on to life is to see what the hell is coming next.

Very truly yours,

CHRONICLE ADS PAY

## ALBERTA NEWS

The Three Hills Board of Trade has invited A. B. Claypool, M.L.A., to give an address on the work of the last session of Parliament at Edmonton.

Following a mass meeting of the Drumheller unemployed, a delegation approached the City council and as a result the men will be given work two days a week instead of one, the wage being \$3.20 per day.

Although untutored in the art of wood carving, W. G. Hodgson, of Dorothy Alberta, has developed his talent along this line and now has several specimens of his artistic work on exhibition at the Edmonton Museum of Arts.

The Drumheller curling rink will be moved to a new position at the south east corner of the Athletic Park.

Alberta will permit homestead entry in certain specified areas, but restrict this to persons of the full age of 17 years, British subjects or with the intention of becoming British subjects, who have resided in the Province for a period of at least three years.

The Bassano Golf Club has reduced their annual fees this year from \$10. to \$5 per annum.

Large flocks of geese have been seen in the Crowfoot district for the past ten days or more. These birds are returning north after spending the winter in the southern states.

The town of Hanna has been invaded during the past few days, by a large number of men from the coast and police vigilance is being increased as a result.

## Southern News

Mrs. Ray Dresser went to Calgary on Friday of last week, to spend the Easter holidays with her parents.

Mr. and Mrs. J.S. Bertsch, Miss Tilly Ella and Hilda Bertsch, Robert and Otto Bertsch, and Pete Schmidt, were visiting with the Klein family of Rosebud on Good Friday.

Mr. C. J. Bertsch Sr., John J. Forsch, Mr. Renn and Mr. Jacob Zeigler made a trip to Turner Valley on Thursday last. They reported very bad roads on account of the heavy snowfall in the southern part of the province.

Miss Erna Rempher of Grainger is staying with Mr. and Mrs. H.G. Kary.

Miss Katie Neher was looking after J. Guttman's store for a few days, while Mr. Guttman was away.

Mr. and Mrs. J.J. Bertsch and Mr. and Mrs. E. J. Bertsch went to Trochu on Good Friday and visited with relatives.

We understand that Mr. Yakes, west of Beiseker has taken over the Watkins Products agency for this district.

Mrs. D. Tetz of Three Hills, is visiting with her parents, Mr. and Mrs. C. C. Permann.

J. M. Ohlhauser went to the George Marshman farm on Monday of this week and was successful in getting work for the spring months at least.

Mr. Ed Ohlhauser will be driving Henry Kary's gravel truck this week.

Mr. Emil G. Ohlhauser went to the Earl Johnson farm on Tuesday to help Mr. Johnson put his crop in.

Mr. and Mrs. George Zeigler and Mr. and Mrs. H. G. Kary went into Calgary on Monday of this week and returned the same day.

Adam Bertsch is looking after the A. P. Elevator in Carbon this week, while Mr. McGregor is away.

## PARTY HELD AT HOME OF MR. & MRS. GEO. WISE

A party was held at the home of Mr. and Mrs. George Wise on Friday, April 3rd, in honor of their fifteenth wedding anniversary. About 25 guests were present and a very enjoyable evening was spent by all. The evening's entertainment consisted of Cards, games and dancing. At midnight a buffet supper was served, where a three tier wedding cake adorned the table.

Mr. and Mrs. Wise were the recipients of many lovely gifts, which were presented to them by little Miss Marie Reid, dressed as a bride. After the presentation Mr. W. Tatterton gave a toast to the happy couple, to which Mr. Wise responded.

Those winning the whist prizes were as follows: Ladies first, Miss Mary Hannah; Gents first, Mr. Jasper Rochester. Ladies Consolation, Mrs. A.H. Jealous; Gents Consolation, Mr. Frank Skerry.

## MR. GARLAND UNDER FIRE

(Calgary Alberta)

The Montreal Gazette has answered Mr. E. J. Garland's complaints about the unfair treatment he claims is being accorded the West.

In an editorial, that journal pointed out that the recent speeches of Mr. Beatty implied that the great Canadian surprise over which he presides is doing its part to remedy conditions in the Dominion, as it has always done. The Gazette points out that the general recession in business has affected the revenues of the C.P.R. and yet that it has maintained its position as Canada's largest taxpayer. A point omitted by the paper is the fact that, in the face of same business recession the C.P.R. has decided to embark upon extensive expansion activities.

In these statements, the Gazette is right. Yet when it comes to criticism of Mr. Garland, that publication destroys the force of what it has said.

"The West will recover notwithstanding the dismal jeremiads of such self-appointed spokesmen as Mr. E. J. Garland, whose dolorous tale was told to the Canadian Club of Montreal on Monday. The spirit of the West has been proven upon many occasions of temporary adversity and it is not spirit manifested by Mr. Garland. The West will emerge from its present difficulties, as it has done in times past, and will be better for its experience and the lessons which that experience teaches. The West was not made by men of Mr. Garland's stamp, but by men of courage and self-reliance and its future is safe in their hands."

Because Mr. Garland, an elected representative, airs his views upon the question of Western welfare, is no reason why he should be termed "self-appointed spokesman," with the evidently objectionable connotation of that phrase. Neither can one justifiably draw invidious distinctions between Mr. Garland and those who built the West, to the detriment of the former.

Because we may happen to disagree with a man's opinions is no reason why we should impute cowardice and lack of spirit to him. It takes courage of a high order to be a Jeremiah, especially in Eastern Canada where everybody is delighted to hear about the West's gratification at all that has been done for its benefit by Eastern financial interests. We may disagree

## DANCE ON MONDAY PROVES POPULAR

The first dance of the season in the Elks hall took place on Monday night of this week and the event was an overwhelming success. There were approximately sixty-five couples present, consisting mostly of the young people of Carbon and district, besides a number from Acme, Swalwell and Three Hills. A few of the old timers were present to enjoy themselves, and old-time dances were interspersed with the modern dances, so that all present were able to enjoy themselves to their heart's content.

The music was furnished by local talent and this music was of a very high order indeed, and it is expected that these musicians will form a local orchestra and continue to play for dances in the town and district.

Refreshments were served at midnight and the dance continued until 3 a.m., the crowd remaining to the last.

With the success of this dance the Elks were able to pay for the alterations to the hall, made necessary by the Theatres Act of Alberta, and now that this work has been done it is expected that dances will be held regularly about once a month or so, providing there is no other conflicting entertainment.

## GLACIAL PERIOD WALRUS SKULL FOUND

The Natural Resources and Development branch of the Canadian National Railways came into possession recently of a walrus skull, believed to be between twenty and thirty thousand years old, which was found in northern Manitoba by George Brown, of The Pas, during recent construction work on the Hudson Bay Railway. The skull was discovered eight feet beneath the surface of a gravel ridge situated eight miles east of the main line of the Hudson Bay Railway. This point is about 35 miles due west of the western shore of Hudson Bay.

The skull is that of the Arctic walrus (*Trichechus Rosmarus*) and probably represents one of the many wanderers that flourished south of the Hudson Bay during the glacial period. Walrus are notoriously gregarious and it is interesting to reflect that, over much of the country at present traversed by the Hudson Bay Railway, there was once heard the deep barking of thousands of these mammals, ordinarily peaceful, but thoroughly formidable when aroused.

The two tusks, some fifteen inches in length, are well preserved after thousands of years beneath the sands, but one is considerably worn at the tip. It is considered possible that this tusk was chipped as the creature sludged among rocks and sea shells in search of food or was broken in a battle with some polar bear, the inherent enemy of the walrus.

The town of Gleichen has approved of a pipe line irrigation system, which will cost in the neighborhood of about \$15,000.

with Mr. Garland fundamentally upon a number of points, but we have no reason to doubt his courage, self-reliance or sincerity.

Pat stood looking in a book store window. This sign caught his eye:  
"Dickens Works All this Week, Only \$8.00."  
"The Devil he does!" said Pat, "The dirty scab."

### Where West Leads The East

General recognition is accorded to the fact that the West leads the East in grain and livestock production. It is known that the Western Provinces have a greater railway mileage per capita than the older settled provinces. It is an established and recognized fact that there are more rural telephones per capita in the West than in the East. It is not so well known that the West leads the East by a wide margin in the field of aviation. Yet such is the case as disclosed by the first annual report of Canadian Airways Limited, recently issued.

According to the report of this company, which is an amalgamation of all the large aviation companies in the Dominion, and in which the Canadian Pacific and Canadian National Railways are now largely interested, the amount of air business done in the West far outstrips the volume of Eastern business, and that operating conditions in the West are more favorable with the result that there is less non-productive flying and consequently greater profits here than in the East.

The figures given in this report will prove most illuminating and interesting to western people. They cover twelve months operation of the Eastern lines, and thirteen months operation of the Western lines. It is shown, for example, that the total mileage flown in the East was 754,199 miles, as compared with 1,213,925 miles in the West. Total flying hours in the East were 7,888, but with the Western total 13,137, or almost twice as great.

But it is when one comes to a consideration of the amount and value of the business transacted, and the efficiency in operation, that the ascendancy of the West over the East in flying is most strikingly illustrated. Mail matter carried over Eastern lines amounted to 126,430 pounds, while the corresponding figure for Western lines was 207,483 pounds. Freight and express carried on the mail 'planes in the East was greater than in the West, being 14,971 pounds as compared with only 307 pounds, but freight and express carried on other than mail 'planes tell an entirely different story and reveal the extent to which this form of transportation has been developed in the West. No less than 404,010 pounds of package freight and express was transported by air in the West, as against 82,151 pounds in the East. In other words, the East has not developed this department of air service, apart from the regular mail 'planes, to anything like the extent that has been done in the West.

In passenger traffic, both on mail 'planes and other aerial services, an even more surprising record has been established by the West, showing that our people are becoming air-minded. The number of passengers carried on mail 'planes in the East was 299, and in the West 3,246; on 'planes other than the mail 'planes, 1,447 Eastern people travelled by the air route, while in the West 3,808 chose the same method. Considering the much larger population of the East the fact that 7,054 Western passengers travelled by air as compared with 1,746 in the East speaks eloquently for this Western country.

This Western predominance in the air has no doubt partly accounted for the fact that the West is now regarded as an ideal country for flying operations, and also because of the further fact that distances between points to be reached are much greater in the West than in the East. That the West is well adapted to flying is demonstrated by the figures of mail efficiency contained in the report under review in this article. Out of a scheduled or possible mileage in Eastern Canada of 677,034 miles, only 558,264 miles were actually flown, leaving a lost mileage of 118,770, or only 82.4 per cent of efficiency. In the West, on the other hand, out of a scheduled or possible mileage of 764,578, productive mileage flown totalled no less than 708,544, leaving only 56,034 miles lost and representing an operating efficiency of 92.7 per cent.

The lighted airways of the West, making night flying practicable and safe, and the very fine municipal airports now in existence and being steadily improved, coupled with the excellence of flying conditions in general throughout the prairie country, provide an assurance that air transportation will more and more prove an important factor in the life of Western Canada, and in all probability a greater factor here than in the older sections of the Dominion.

He who will learn of none but himself hath a fool for a master.

Australia's apple crop this year is estimated at 7,000,000 bushels.

## PAINS

No matter how severe, you can always have immediate relief:

Aspirin always stops pain quickly. It does it without evil effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

### A Secret Expedition

A. Innes Taylor, only Canadian to accompany Byrd on his Antarctic expedition, has arrived at Vancouver from White Horse, Yukon, to admit that he is soon to join another expedition of exploration which, however, he declared he had been ordered not to reveal. The expedition throughout, he stated, is to be conducted in secrecy. Formerly a member of the R.C.M.P., he had charge of all the huskies with Byrd.

### Three Ingredients Needed

A blizzard calls for three ingredients, and must have all of them: cold, high wind, and a heavy snow-fall, with the latter not so important as the first two because cold and a high wind to keep the snow in the air can create the impression of a heavy snowfall even when it is comparatively light.

No man is wise enough to ignore the things his wife can teach him.

### Canada Well Advertised

#### Descriptive Booklet Was Distributed At Buenos Aires Exhibition

Canada was well advertised at the Buenos Aires exhibition in the Argentine Republic, fifty thousand copies of an artistically-designed booklet descriptive of this country having been sent to the exhibition for distribution. The booklet is written in Spanish and so is the wording on a series of beautiful pictorial blotters that were distributed with it.

The publicity branch of the Department of Trade and Commerce produced the booklet, which is of a quality reflecting credit upon the publicity director, H. E. M. Chisholm. The author does not forget to tell his South American readers that Canadians invented the telephone, originated the idea of standard time, built the first submarine telegraph, made the first electric stove, discovered insulin and did other remarkable things. Many of our own citizens would profit from reading what the blotter has to say about our form of government, nor national resources and the characteristic features of the country.—Toronto Star.

### Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, sourness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sours, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try laying aside all digestive aids and instead get from any druggist some Bismarck Magnesia and take in water right after eating. This sweetens the stomach, prevents the formation of excess acid and there is no sourness, gas or pain. Bismarck Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

### Novel Christening

#### Cracked Ice Is Used To Christen Submarine That Will Cross Arctic Ocean

They used cracked ice to christen the "Nautilus," the reconditioned submarine in which Sir Hubert Wilkins plans to cross the Arctic Ocean this summer.

The cracked ice was contained in a small silver barrel perched on the prow of the vessel. Lady Wilkins yanked a string, and the barrel discharged its eminently symbolical contents—symbolic because the "Nautilus" will attempt to cross the top of the world under ice floes, coming up now and again for air and observations.

**The Family Physician.**—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises, and sprains. The presence of this remedy in the family medicine chest saves many a fee.

And the relatively small number of railway wrecks may be due to the fact that the engineer never hugs the fireman.

With so thorough a preparation at hand as Miller's Worm Powders, the mother who allows her children to suffer from the ravages of worms is unwise and culpably careless. A child subjected to the attacks of worms is always unhealthy, and will be stunted in its growth. It is a merciful act to rid it of these destructive parasites, especially when it can be done without difficulty.

A herd of starving deer in Alaska, was recently fed by bales of hay dropped from airplanes, very much like manna from above.

### The Issue In India

#### Retired Official Gives His Opinion Of the Situation

"I have been in India 46 years and cannot help thinking that most of our troubles are due to the fact that in the past, politicians failed to think out the results of their actions to their logical conclusion," said Field Marshal Sir William Birdwood, who has just retired as commander-in-chief in India, in a speech to the London Devonian Society, England.

"I hope that whatever government is in power will remember that the masses of India are illiterate and inarticulate and will see that the safeguards we read about will be real safeguards; and that those people will not be handed over to the intelligent-Asia who speak in the name of India without having the same affection for the cultivators of the land as we English people have," the field-marshal added.

### Just As Dangerous

Mother was poking about in the shrubs when she suddenly called out: "Look, Junior! Here's a little green snake!"

"You better look out," cautioned Junior. "It may be just as dangerous as a ripe one."

### Ceases Publication

After 103 years of publication, the Athenaeum Magazine is disappearing from London news-stands through a merger with the New Statesman and Nation. The new magazine will be committed to no political policy, its sponsors say.

### DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colors—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J. F. T., Montreal.

### Alberta Egg Production

Alberta shipped 115 cars of eggs eastward in 1930, according to R. H. Ennis, federal egg inspector, who added that the months of January and February this year had apparently been record ones in egg production.

### Smothering and Fainting Spells

#### Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.E., writes:—"I had been troubled with smothering and fainting spells and everything in front of me would turn black, and I would fall down in a faint and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and decided I would give them a trial. I used four boxes and found they help me wonderfully."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Artificial Lighting Units May Be Used Instead Of Sunlight In The Grading Of Grain

Grading of grain in Canada is done by the natural light of the northern sky. In an effort to overcome the obvious inconveniences of this method, one of which is the difference in light at the various inspection points, and another, the limitation on time, the National Research Council, at the request of the Board of Grain Commissioners, has devised a series of artificial lighting units. E. B. Ramsay, the Chief Grain Commissioner, and J. D. Fraser, the Chief Grain Inspector, have inspected the results of the experiments and two of the most promising units are being shipped to Winnipeg to be tested.

In order to get sufficient uniformity of illumination the lamps are placed in an inspection stall which is boxed so the inspector cannot look directly at the light. The illumination in one of the units to be tested is a combination of direct and indirect lighting uniform over a table space about two feet square. Various combinations of mercury and neon lamps have been studied. To the laymen one of the striking results of the experiments has been the difference in effect which various combinations of the lights used have had in showing up the defects or good qualities of the grain examined.

As a part of the general experiment the spectra of light reflected by various samples of wheat have been measured by means of a recording microphotometer. It was found that using light of wave lengths from the far red to about the blue, starchy wheat reflected more light than good, green or frozen wheat; green and frozen wheat approximately the same, and good wheat less than the others. Light of shorter wave lengths gave different results but the final conclusion reached was that there appeared to be no definite absorption of selective reflection of visible light which would make grading by physical means possible.

Dr. D. C. Rose has been conducting the experiments in the John Street laboratories of the council at Ottawa, under the direction of Dr. R. W. Boyle, the director of the Division of Physics. Dr. Rose has been requested to supervise the installation of the lights in Winnipeg.

### Market Must Be Regained

University Professor Stresses Increased Hog Production In Western Provinces

Increased hog production in the next few years was prophesied by Prof. J. P. Sackville, of the University of Alberta, in addressing the Saskatchewan Swine Breeders' Association at dinner at the Kitchener Hotel, Regina.

The need for regaining export markets for hogs was stressed by the speaker. E. P. Brocklebank, of the University of Saskatchewan, director of the Boys' and Girls' Swine Club, outlined the plans of this group to ship a carload of hogs to the Royal Fair next winter, in co-operation with the swine breeders. The president of the association, E. F. Richardson, presided at the dinner.

A man of over eighty claims to have made a gramophone that can be heard distinctly at a distance of a mile. All we can say is that he ought to know better at his time of life.

Rescuer: "You could have helped yourself—you can swim."  
Rescued: "Yes, but who can think of that when he is drowning?"—Kasper, Stockholm.

W. N. U. 1884

### Speed Of Light

Light Always Travels At A Uniform And Fixed Speed, According To Scientists

Light travels always at the same speed, according to the finding of a scientist who thus adds fresh proof of the correctness of Professor Einstein's relativity theory in which it is assumed that the velocity of light is absolute. Prof. George Joos, of Jena University, Germany, claims to have proved the uniformity in the speed of light by the use of a device which he says measures accurately one-thousandth of the length of a light ray.

(By Annette).

THE NEW MODE IS JUST AS KIND TO THE CHILDREN AS THE ADULTS

Any little miss would adore this jumper dress that big sister is wearing at college.

It delights in the fact that it is an exact copy too of the grown-up mode. Even to the fabric which is a thin woollen in a small check pattern in light navy blue and white. The belt is blue shiny patent leather.

The tailored blouse chooses a cotton broadcloth in yellow-beige.

The circular swaying skirt necessarily attracts much attention with the growing miss, who so loves to feel important in clothes of smart sophistication.

Style No. 187 may be had in sizes 6, 8, 10 and 12 years.

Coral-pink linen with white dotted swiss blouse is so pretty.

Sailor blue wool jersey with white batiste dotted in matching blue is another lovely choice.

Tweeds, tweed-like cottons, wool crepe cotton shantung prints, pique, cotton broadcloth prints, gingham, tub silks, etc., are suitable and smart fabrics.

Spring, the season of prettiest styles, will soon be here. Prepare now by ordering a copy of our new Fashion Magazine. Attractive styles for women, misses and children. And instructive lessons in sewing.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### LUCKY WINNER

Mary Pacheco, of New Bedford, Mass., a 21-year-old mill worker bought a dollar sweepstake ticket to get rid of an importunate salesman. She won the \$40,000 prize in the Army and Navy Veterans of Canada draw, and has just received cheque of \$38,303, her profits after deduction of taxes.

### Decide Menus Are Dull

Gastronomic Futurists Of Europe Urge More Beauty In Food

European Gastronomic Futurists, sitting at an Academy of Good Eating, have decided that our present menus are too dull and need more color and perfume; that talking at the table is as sacrilegious as talking in church, and that the knife and fork must be suppressed.

Good food must be artistic, like sunsets and oil paintings, the academy decided and forthwith set about drafting an entire new set of recipes.

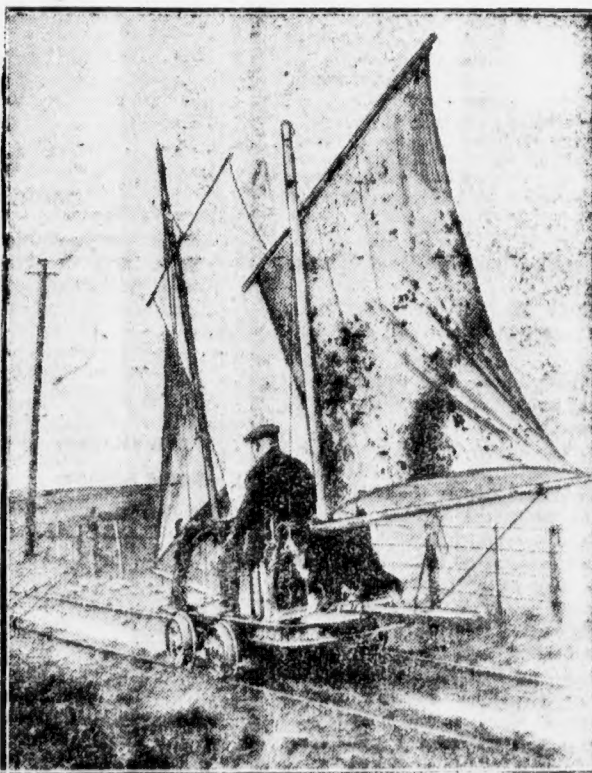

The Academy would turn the kitchen into mixed laboratory-beauty-shop with all sorts of scientific instruments. Good cooking would be a science, not an art, and the cook would follow a formula, like a chemist mixing drugs.

The Academy believes in music and perfume between courses. Before any dish is served, special music and a perfume to fit it are introduced. With woodcock, for example, there would be music of the hunting horns and perfume of the forest in October.

The Academy would end after dinner speeches. Oratory and cooking never mix.

The Academy suggests that between courses many beautiful and attractive dishes of food be carried to the table and passed rapidly under the noses and eyes of the guests to excite the curiosity, surprise and imagination. These foods would not be eaten. There would also be a "food cocktail," one spoon filled with a concoction of a dozen tastes and perfumes.

### UNIQUE MODE OF TRAVEL

With five miles to and from work to travel each day, and with no means of transportation, W. H. Slater, a retired naval officer, devised this ingenious means of reaching his labors at Cliffe, Kent, England. The "sail-train" or land yacht, is constructed from an old quarry truck chassis and sails, and travels over the rails of the abandoned quarry at a fair rate of speed.

## War-Time Pilots Have Plan For Establishment Of a Royal Canadian Air Force Reserve

### When the Current Goes Off

Everything Stops In This Highly Electrified Age

It makes us laugh, with a hearty old laugh, to see how completely our homes go to pieces nowadays when anything happens to the electric current. It used to be that when a storm broke down the electric wires, the only thing that happened was that the light went out. Now, when the light goes out, everything else quits too. There is no ice in the ice-box, no music in the piano, no coffee in the percolator, no dialogue in the radio, no toast in the toaster; the vacuum cleaner stands silent in the corner. Sister can't curl her hair. Brother's toy trains stop running, the heat in the bathroom goes off, the bed-warmer doesn't work, and the orange-squeezer stops squeezing right in the middle of an orange. It's just a question of gathering around a log fire and marking time till the storm abates.

### BETTY BARCLAY'S HELPFUL HINTS

#### Today Betty Says:

Unless we get sufficient vitamin "C" each day, tooth decay is very likely to set in. One prominent authority, Dr. Milton Theodore Hanke, of the University of Chicago, recommends a full pint of orange juice daily with the juice of a lemon added, as the proper daily amount of Vitamin "C" necessary to check dental decay. It's easy enough to make children take this kind of medicine. To them, such a drink is a luxury at any time of the day.

When following recipes, make your teaspoons and tablespoons level unless otherwise specified. Those who fail to do this cannot blame the recipe if anything goes wrong.

Efforts will be made to establish a Royal Canadian Air Force reserve following discussion at the first reunion dinner of the Canadian War-time Pilots and Observers' Association held at Ottawa. Under the scheme senior officers who served overseas will be enabled to continue flying and through that medium increase public enthusiasm in air transportation.

Friendships were renewed and bonds of service recalled at the gathering of pilots. It was decided to make the dinner an annual affair and it will be held in Montreal next year.

Suggestion that Rockcliffe Field, Ottawa, be named "Baker Field," after the distinguished Canadian airman, Lt.-Col. W. G. Barker, V.C., who was killed in an aeroplane accident there some months ago, came from J. A. D. McCurdy, of Montreal, first Canadian to fly a "plané." He also suggested St. Hubert aerodrome, Montreal, be renamed "Bishop Field" after Col. W. A. Bishop, V.C., famous war ace, who was the guest of honor.

Besides Mr. McCurdy and Col. Bishop, Hon. D. M. Sutherland, Minister of National Defence; Major-General J. H. MacBrien, president of the Aviation League of Canada, and Major-General A. G. L. McCaughton, chief of staff, were among the speakers.

Seeking to increase enthusiasm for gliding, Aviation League of Canada adopted a motion requesting the Department of National Defence to establish a curriculum of training for glider-flying. Accident were responsible for holding down the popularity of gliding in the Dominion, speakers held. It was suggested the defence department might supervise designs for gliders to be used in this country.

Close co-operation between the league and the Canadian Flying Clubs Association will be maintained. It was decided, as an agency for the development of Canadian aeronautics, it was decided that the national aircraft model contest which proved a success in 1930, should be repeated this year. Venue and date for the contest will be set later.

### Needed Better Treatment

Indian Medicine Man Lost Faith In Drum Beating

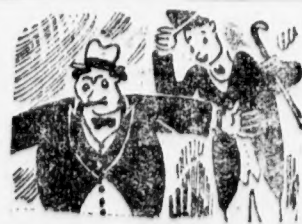

Out in Kispiox, B.C., lives an Indian medicine man who is not at all sure about his own medicine, according to a letter received at United Church Home Missions offices in Toronto, from Miss Menzies, field matron, who does district nursing on the Kispiox reserve.

In her letter Miss Menzies says the medicine man called upon her for attention. Previously he had always refused her offers of aid. When she asked the patient why he did not beat the drum for himself and take his own medicine, he replied: "Sometime drum alright. Sometime medicine alright. But me sick."

### A Good Opportunity

The farm boys and girls who took special agricultural courses during the winter will find ample scope on the home farm to try out their recently acquired knowledge. The problems were never bigger and the need of accurate information was never greater than now, says the Farmers' Advocate.

A study of the causes of heart disease has been started by New York State health officials.

"You seem sad—have you lost an body?"  
"Quite the opposite—I have just had triplets."—Moustique, Charleroi.

## WHY FAT MEN STAY FAT

"The trouble with me, and I guess this applies to 99 out of every 100 men who are putting on weight, I didn't have the energy or 'zip' to keep it off. Lost all interest in any healthy activity and just lazed around accumulating the old pounds, until I got that 'Kruschen feeling.'"

Start taking Kruschen Salts—that's the common-sense way to reduce—but don't take them with the idea that they possess reducing qualities in themselves.

This is what they do—they clean out the impurities in your blood by keeping the bowels, kidneys and liver in splendid working shape, and fill you with vigor and tireless energy.

As a result, instead of phanting yourself in an easy chair every free moment and letting flabby fat accumulate, you feel an urge for activity that keeps you moving around doing the things you've always wanted to do and needed to do to keep you in good condition.

Kruschen Salts are the up-to-date Fountain of Youth. Take one-half teaspoon in a glass of hot water tomorrow morning and every morning—be careful of the foods you eat—take regular moderate exercise—then watch the pounds slide off.

### FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c. package.

This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c. immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Estab. 1756). Importers: McGillivray Bros., Ltd., Toronto.

## WORLD HAPPENINGS BRIEFLY TOLD

The next session of congress will probably see restriction of immigration from Canada to about 4,000 annually.

A general election in Britain before the end of the present year was predicted in an address by S. K. Radcliffe, British journalist.

The visa fee for Canadians going into China has not been increased so far, it was learned at the Chinese consulate at Ottawa.

A visit to Canada by Lord Jellicoe, as a delegate to the British Empire Service League meeting at Niagara Falls, is expected to take place in August.

Serious losses through cutworm are predicted for 1931, in Saskatchewan, if average weather conditions prevail, according to a warning by the Department of Agriculture.

Preservation by Canada of early specimens of architecture was urged at a meeting of the Royal Canadian Institute by Prof. E. R. Arthur, of Toronto.

About fifteen million years ago giant snails fifteen feet long climbed around the stern cliffs of Quebec. A piece of the shell of one of these monsters of the Ordovician period has been found imbedded in a limestone cliff on Viaduct Hill.

The ban on the use of dogs in hunting deer may be brought into effect by legislation at the present session of the Ontario legislature. After several contentious sessions, the fish and game committee voted 10 to 9 in favor of continuing the use of dogs.

## Aching CORNS STOP HURTING INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

**PUTNAM'S**

## SUNDAY SCHOOL LESSON

APRIL 12

### THE PRODIGAL SON

Golden Text: "There is joy in the presence of the angels of God over one sinner that repenteth."—Luke 15, 10.

Lesson: Luke 15.

Devotional Reading: Isaiah 51, 1, 2, 6-11.

#### Explanations and Comments

The Parable Of the Prodigal Son; the Son Sinning and In Want, verses 11-16.—As we first see the prodigal son, he is a picture of supreme selfishness. He demands from his father the portion of his property that would legally be his, and upon receiving it he betakes himself to a far country.

"Every one of us is making some demand upon life. It may be shouted from the housetops for all the world to hear, or advertised in every word and act of our life. The whole cry of some men is 'Give me, Give me!' Never mind the price. Never mind what it costs of the finer things,—the love, the honor, the joy of a clean soul, the pain of others. 'Give me the portion of goods that falleth to me.'"

—James Reid. How far will selfishness carry one if he follows it to the end? It carries the prodigal steadily downward. In the far country the wayward boy has his reckless fling. He becomes a spendthrift and a reprobate—he wastes his substance with riotous living. He loses his fine feelings, his friends, his good food, his good garments, and at last he comes to a field and the company of swine. Even the husks or pods of the carob tree given the swine are welcomed as food, for he is in sore want.

Riotous living may have for us no lure, but we may be guilty, nevertheless, of squandering our portion, be it youth, talents, education, time, opportunity, life.

The Son Coming To Himself, verses 17-19.—Referring to Swan's great picture of the Prodigal Son in the Tate Gallery, London, England, W. L. Watkinson said: "It is a masterpiece. The prodigal son, himself, is a very melancholy figure, and as for the swine they are simply fiendish, most diabolical beasts. But what struck me most of all is that the great painter had put in a few dabs of red. That is the poetic touch. In his dark cartoon Swan has painted in a few red poppies." There is a bright spot in the dark picture of the parable—the prodigal "comes to himself."

The Return and the Father's Forgiveness, verses 20-24.—The prodigal immediately carries out his high resolve. He returns in rags and tatters, a gaunt and unkempt vagabond.

"It is often a long journey from a resolution to its realization. The journey is frequently so long that it is never completed, and the resolve never becomes a reality. This is true because in so many instances the good resolution has nothing to back it up except a tainted life, and a weakened will. In the will of the prodigal there was still life and power."

We can picture him as he travels the long weary stretches back to his home, rehearsing in his mind the appeal he proposes to make there. How will his father receive him? He has ventured on no greater hope than to be received as a hired servant. But his father's love is far larger than he dreams. While he is yet afar off his father sees him and is moved with compassion; he runs to meet and kiss him.

"Yet a great way off he saw me, ran to kiss me as I came; As I was my father loved me, loved me in my sin and shame." —Terstegen.

An efficacious household remedy — Douglas' Egyptian Liniment. Brings immediate relief to lame back and muscular rheumatism. Also relieves inflammation, burns, sores, corns and warts.

### Discounts Russian Wheat Menace

Predicts That Within Five Years There Will Be a World Clamor For Wheat

The dark shadow of Russia on the wheat marketing picture will vanish gradually.

Within five years, there will be a world clamor for Alberta wheat.

Such were two of the main points in an optimistic address, delivered by Premier J. E. Brownlee, at the annual banquet of the Alberta Association of Professional Engineers in Edmonton. At the time he was replying to the toast to "The Province of Alberta."

Declaring that Russia was at the lowest margin upon which human life survived, Mr. Brownlee said it was evident that the country would move to higher standards of living.

"My brother is very intelligent. He has married a teacher."

"My brother is more intelligent. He isn't married at all."

**Spasmodic Croup Quickly Checked**

### Queer Place For Chapel

Four Bridges In England Have Church On Them

Wakefield's historic bridge over the River Calder—one of the four bridges in England to have a chantry chapel built upon it—is to be relieved of much of its traffic by the erection of a new bridge near by.

Such a bridge has long been necessary, since the present one is much too narrow to accommodate the heavy stream of traffic flowing between Leeds and Sheffield. The present bridge is to remain with its famous chapel in its historic position. The chapel has been used as a bacon factory, an old clothes shop, a library, a dairy, a corn factor's office, a jail and, since its restoration in 1842, as a church.

Asthma Can Be Cured. Its suffering is as needless as it is terrible to endure. After its many years of relief of the most stubborn cases no sufferer can doubt the perfect effectiveness of Dr. J. D. Kellogg's Asthma Remedy. Comfort of body and peace of mind return with its use and nights of sound sleep come back for good. Ask your druggist; he can supply you.

### British Wholesale Society

May Establish Packing Plant In Western Canada

The Toronto Globe publishes the following despatch from Ottawa:

"Representatives of the Co-Operative Wholesale Society, with headquarters at Manchester and hundreds of stores throughout England, had a conference with Hon. Robert Weir, Minister of Agriculture. It is understood the 'Co-Op.' as it is popularly known in Britain, is contemplating establishment in Canada. The visitors also are looking over the ground to see what they can purchase from the country in the way of food products.

"Their packing plant may be established in western Canada. H. S. Arkell, superintendent, and J. M. King, secretary of the Canadian Livestock Co-Operatives, accompanied them."

### Delegation May Bring Better Trade Relations

Increased Business With Argentine May Result From Visit

The visit of the Canadian trade delegation has aroused the press of Buenos Aires to comment very favourably on the prospects of closer trade relations between the two countries.

It has even been suggested that negotiations be initiated for a mutual understanding between the Argentine and Canada on the all-important question of marketing wheat. Both countries, it is pointed out, would greatly benefit by such a move, although a basis of any such agreement has not yet been suggested.

Cordial discussions took place over a week-end between members of the Canadian delegation and representatives of the Argentine Government. Arising out of these discussions, it is confidently anticipated more profitable future business will result for both countries.

### Wear On Shoes

The U.S. Bureau of Standards in Washington, D.C., has a walking machine for testing the life of shoe leather. In 24 hours the machine gives the equivalent of several months of wear to a pair of shoes, while observers study the reaction of the leather to the severe strain of the test.

Some grades of silk have been cheaper in London recently than they have been for 100 years.

In a recent month Norway exported 18,800 tons of fish.

**RASHES VANISH QUICK**

"My face was covered with itching rashes. One application of 'Sootha-Salva' ended the itching. It cleared my skin." Mrs. C. B. Hines. Get "Sootha-Salva" today. All druggists.

### BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Peroxine Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

### This Motorist Was Lucky

Train Smashed Car But Driver Escaped With Minor Injuries

Motorists who race locomotives to grade crossings seem to be blessed sometimes with an amazing good fortune. The driver of an automobile in the Southern States, recently was hit amidships by a yard engine. His life was saved by little short of a miracle. The locomotive crushed the wheels of his automobile, the chassis of the car dropped to the railroad tracks, and the automobile and driver were pushed along the track at a good rate of speed for more than 150 feet. The driver escaped with minor cuts and bruises. He collected the spare parts of his automobile, and aided by the railroad wrecking crew managed to get his smashed motor car to a vacant lot.

The milky way of the heavens is said to contain approximately 30,000 million fixed stars.

Morocco plans to develop its coal and iron ore resources.

### Which Would Do Most Work?

**Long Hair** is like a blanket. Leave it on and your horses sweat excessively and all night this cold wet blanket of long hair chills the horse and prevents proper rest. Horses in run down condition are easy prey to colds, pneumonia and other ills.

**Remove** the long hair. Clipping gives new life to horses—they do more work on less feed—are dry at night and get proper rest. Clipped horses easily groomed, less subject to illness, always fit for full day's work. Keep your horses on the job. **Clip NOW.**

**New Stewart CLIPMASTER**—an electric clipper for clipping horses and cows, weighs only 3 1/4 lbs. and easily held in hand like grooming brush. Works from light socket, has 25 ft. extension cord, special universal motor. Price, complete, only \$28.75.

STEWART No. 1 Clipping Machine. Clips fast. Lasts many years. Strong, simple, ball-bearing, easy running, stays sharp. Clips horses and cows. Price only \$15.00. If your dealer cannot supply STEWART machines, send \$2.00 to factory, pay balance on arrival. Satisfaction or Money Refunded.

Flexible Shaft Co. Limited Factory and Office: 349 Carlaw Ave., Toronto STEWART

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

**WINDOLITE**

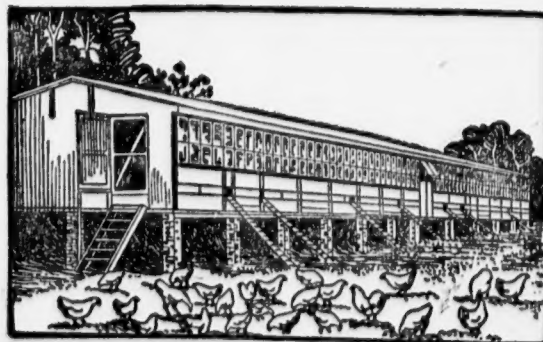

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

## LAY PLANS FOR MARKETING OF THE WHEAT CROP

Rome, Italy.—The first steps were taken towards the orderly marketing of the world's next wheat crop. Representatives of Canada, the Argentine, Australia, Bulgaria, Hungary, India, Poland, Rumania, the Soviet Union and Yugo-Slavia met to discuss preliminaries to the summoning of a formal conference where, it is hoped, a definite agreement will be reached for the sale of the 1931-32 crop.

It was upon the motion of Hon. G. Howard Ferguson, Canada's high commissioner in London, England, and the Dominion's chief delegate at the conference, that the production committee adopted the suggestion of a later conference to deal with marketing the crop which is to come. Mr. Ferguson's motion read, "That this conference, recognizing the importance of orderly marketing of the export surpluses of wheat and being convinced the present low price of wheat on the world's markets is a serious factor in the present economic depression, is of the opinion that it is desirable that delegates of countries exporting wheat should meet together as soon as possible to organize on an international basis the exportation of the crop of the year 1931-32."

The motion concluded by suggesting that the United States also be invited to take part in the discussion. One suggestion is that the deliberations should be held in Canada early next summer.

The proposed conference covers a broader field than was originally suggested. As the work of the present wheat conference has proceeded so many divisions of opinion have been revealed that anything like a general agreement among the 46 nations represented appears to be highly improbable. The gulf between the overseas countries and the European wheat-exporting countries seems to be wide.

The Danubian countries again sought tariff preferences in Europe for their wheat. But to this serious objection was again made and proposals involving rationing of production met with like objections. The overseas exporting countries discussed orderly marketing, apart from the conference proper, and encountered so much success that approaches were made to the Dominion countries. They agreed to join a conference to be held next year and the Soviet delegation did likewise, making their agreement, however, conditional on the approval of the Soviet Government.

Then came the formal motion in the wheat production committee by Canada's chief delegate. The committee approved the motion and representatives of all the producing countries concerned met to discuss preliminaries.

### Want Health Probe

#### Urge Public Health Inquiry In Province Of Manitoba

Winnipeg, Man.—Inquiry by a special select committee of the Manitoba legislature into matters of public health in the province was urged in the House recently by J. W. Pratt, Independent member for Birtle. His probe request was supported by Dr. Murdoch MacKay, Liberal, Springfield, and J. B. Laughlin, Conservative, Killarney. The question of state medical aid would have to be considered by the government within a short time, Dr. MacKay believed.

### Would Replace U.S. Grain

#### Ontario's Grain Requirements May Be Supplied From West

Toronto, Ont.—Western Canada grains will replace those imported from the United States for use in Ontario if legislation is passed next year, following investigation now being made by the Department of Agriculture, under Col. Thomas Kennedy. The expected legislation will probably bind grain pools, elevators and feeders of the province in a co-operative arrangement.

## Winners In Writing Contest

### Novel By Calgary Girl Carried Off Third Prize

Montreal.—A Dominion-wide contest in novel writing came to an end with the announcement that Raymond Knister, of Port Dover, Ontario, has been awarded first prize of \$2,500 for his winning manuscript. The book will be published by the sponsors of the contest, an Ottawa publishing company.

Second prize of \$1,500 went to Marcus Adaney, of Toronto, and Ella B. Wallis, of Calgary, won the third prize of \$1,000. All three books will be published in the near future.

Several manuscripts were thought to be of such merit that the contest judges recommend that they be published also. Included in this latter group were books by Laura Goodman Salverson, Port Arthur, Ontario; Francis Owen, Edmonton; and Isobel E. Henderson, Winnipeg.

The object of the contest was to demonstrate to Canadian readers that 100 per cent. Canadian books rank as high as those published anywhere, and that there are many potential authors in the Dominion.

## U.S. Airplane Crash

### Knute Rockne, Notre Dame Football Coach, Is Killed

Bazaar, Kas.—Knute Rockne, Notre Dame football genius, plunged to his death with five fellow-passengers and two pilots on a Transcontinental and Western Air Inc. air liner in the mid-Kansas grazing country near here.

The 'plane California-bound from Kansas City, crashed on a farm, killing all eight occupants instantly. Witnesses said the craft, flying through clouds and fog lost a wing in the air and hurtled to the ground like a crippled bird.

The body of Rockne was identified by W. L. White, son of William Allen White, of the Emporia Gazette. The famous coach boarded the 'plane just before its departure from Kansas City, in mist and rain, at 9:15 a.m. He was bound for Hollywood to complete arrangements for making talking pictures.

## Was Secretary To Royalty

### Lord Stamfordham Passes Away At Advanced Age

London, England.—Lord Stamfordham, secretary to royalty for the past 50 years and said to have possessed more state secrets than any other man, died recently. He was 81 years old.

Born Arthur Bigge, the son of a country vicar, Lord Stamfordham was private secretary to Queen Victoria and at the time of his death was private secretary to the King. He was often referred to as "the man behind the throne."

On March 11, Lord Stamfordham underwent an operation but this resulted in little improvement in his condition.

The private secretary is survived by two daughters, the Hon. Mrs. Victoria Eugenie Adeane, and the Hon. Margaret Bigge. Lady Stamfordham died in 1922.

## Appointed Lieut. Governor

### Lt. Col. Munroe Receives Appointment For Saskatchewan

Ottawa, Ont.—Lt. Col. Hugh Edwin Munroe, M.D., O.B.E., of Saskatoon, has been appointed Lieutenant-Governor of the province of Saskatchewan. Announcement of the appointment was made by Premier R. B. Bennett. He succeeds Hon. H. W. Newlands. Dr. Munroe is one of the "old timers" of the North West Territories and a prominent medical practitioner of Saskatoon. He has a distinguished war record.

Mr. Newlands retired from office on December 31, 1930. At that time Sir Frederick Haultain was appointed administrator of the province.

Because of illness of Sir Frederick, an acting administrator was named, Mr. Justice J. T. Brown, of the Saskatchewan Court of King's Bench, now holding this post.

Earnings of workers in the iron and steel industry of England now average \$12.90 a week.

## MINISTER TO CUBA

Sir John Joyce Broderick, newly appointed British minister to Cuba, photographed when he sailed from New York for England, where he will enjoy a short vacation before taking up his new duties. He was formerly attached to the British embassy in Washington. He sailed March 14.—Associated Press Photo.

## Reports Say Ottawa Plans Domestic Loan

### To Cover Obligations Maturing Within Two and a Half Years

Ottawa, Ont.—While there are many rumors of government financing to provide for large maturities within the next few years, no decision as to the plan to be adopted has been reached. Canada paid off her \$25,000,000 maturity in New York, April 1, out of money raised last year. This loan was one of the first war loans, and was floated in 1916.

In respect to the very large obligations which will mature within the next two and a half years there has been no official pronouncement. These total more than a billion dollars. It is the general impression that the government proposes to utilize domestic resources and that a large loan will be floated in Canada. Premier Bennett, in his capacity of finance minister, has the matter in hand, and the policy of the government will be announced in due course.

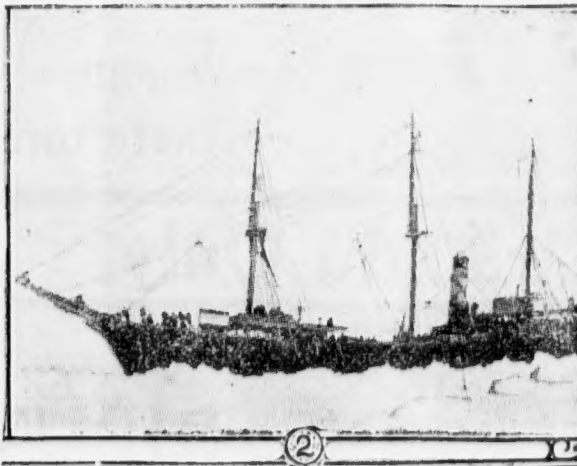

## Wheat Stocks Less

### Visible Wheat Supply Shows Big Decrease Over Last Year

Winnipeg, Man.—Decreasing supply of Canadian visible wheat was down at end of March to 183,489,397 bushels—more than 12,000,000 less than jammed elevators of North America a year ago. According to a report issued by E. A. Ursell, statistician to the Board of Grain Commissioners, stocks declined 2,135,966 bushels during the week ended March 27.

Ocean shipments of Canadian wheat fell off slightly, totalling 2,906,430, as compared with 3,737,809 bushels for the previous week. Notably, the clearance decrease was at United States ports on the Atlantic, where shipments totalled only 977,000 bushels. From Canadian Pacific ports shipments were 1,477,761 bushels. Clearances from Canadian Atlantic ports were 531,669 bushels.

## SEALING VESSEL EXPLOSION

Twenty-one men are dead, and many injured as a result of the explosion supposedly of the powder compartments of the sealing ship "Viking" off the coast of Newfoundland. The photograph shows the "Viking." It was in the "Viking" that Fridtjof Nansen, Norwegian explorer, made his first journey north.

## Earthquake Takes Heavy Toll

### City Of Managua, In Nicaragua, Is In Ruins

S.S. City of Panama, in Corinth Harbor, Nicaragua.—The City of Managua is in ruins and there are hundreds of bodies. Hoke Palmer, United States Marine Corps aviator, said on his arrival here, after witnessing the results of the earthquake which devastated Managua. The city was still on fire when he left, he said.

Palmer had come over here from Managua to scrape up all the medical supplies he could get from this ship and from any other source where they were available.

"The whole town is in ruins," he said. "I don't think there's a building left standing, and there are hundreds of bodies buried."

"The heaviest toll taken was in the penitentiary, which collapsed, and looked as though it had been ground to powder."

"Fire roared through the wreckage, and there was a panic in no time. Martial law was declared immediately."

"The railroad is destroyed, and all the wires are down. You can't get any word outside except by 'plane to Corinth, and then possibly by radio."

"When my 'plane left Managua the marines had the rescue work well under way."

## Ripped Fabric Caused Dirigible Disaster

### Commission Gives Report On Crash Of R-101

London, England.—The disaster to the dirigible, R-101, which stunned the world when it came down in flames on a hillside near Beauvais, France, last October, killing 48 men, has been attributed to mechanical causes, and not to human failure. The report of the Simon Commission, which made a long study of the disaster, and just made public, attributed the disaster mainly to "a substantial loss of gas in very bumpy weather."

The report considered that it was probable that the forepart of the ship's envelope was ripped. "Something of this sort happened on a previous occasion and no amount of care could assure that it would not happen again," the report said, emphasizing the possibility of mechanical failure in dirigibles as at present constructed.

The commission refused to take a position one way or another regarding the effects of the tragedy on the future of lighter-than-air navigation.

## Look For Better Prices

### Believe Canadian Wheat Prices Due For A Rise Shortly

Toronto, Ont.—Belief that Canadian wheat prices are due for a rise shortly, was expressed by C. W. Peterson, of the Farm and Ranch Review, Calgary, Alberta. Europe, contended Mr. Peterson, who is visiting the city, could not continue to produce wheat at present prices and when they did advance their prices the Canadian price would also increase.

United States, he thought, would soon disappear from the wheat market and would become purely an importing country.

## WILL MAINTAIN CLOSE CHECK ON EXPENDITURES

Ottawa, Ont.—"Every department must live within their appropriations; if not, then some gentlemen are going to lose their positions," declared the prime minister in the House of Commons. The House was in committee of supply considering supplementary estimates and had under examination an appropriation amounting to "505,510.46 to cover unprovided items 1929-1930," as per auditor-general's report. The item finally passed.

Mr. Bennett traced the growth of this annual amount, and asserted that if parliamentary control over appropriations was to be maintained, then discipline must be applied or the whole system would be wrecked. The amounts covered by the item had already been paid, and all that was being asked was merely to legalize the expenditures and begin the new fiscal year on April 1 with a clean sheet.

"I agree with the prime minister as to the desirability of exercising the closest possible control over public officials," declared Mr. Mackenzie King, leader of the opposition, but the prime minister should recall that he (Mr. Bennett) had had this for eight months of "the fiscal year, while the previous administration had had only four months. In view of that the responsibility for the over-expenditures lay with the government. The items, which had appeared regularly every year, were due, not to over-payment, but to unforeseen expenditures, which did not imply negligence on the part of anyone."

The question of whether the control of the auditor-general began before or after the payment of accounts was raised, the prime minister contending that this official's duty was to check the accuracy of the amounts and the authority for the expenditures. The money, he said, was paid before the auditor-general had a chance. Hon. Charles Stewart (Liberal, Edmonton West), declared that the prime minister would find it the most difficult thing in the world to close out accounts at the end of the fiscal year.

Mr. King recalled that in 1921-1922 the outgoing Conservative government had left an amount of \$2,055,630.86 to be accounted for in the corresponding item for that year. Compared with the sum now under consideration it could be seen, he said, how the last administration had exercised care and caution. The prime minister observed that special reasons had existed then, the magnitude of the sum being due to activities in connection with unemployment relief.

The situation was, said the prime minister, that the present government, in an endeavor to have all things squared away for the beginning of the fiscal year, was seeking authority for the payment of these accounts now instead of placing them in the next supplementary estimates for 1931-1932.

"I am making an endeavor to see that hereafter there will be no over-expenditures by deputy ministers in the administration of their departments."

It might be that his conceptions of his obligations as minister of finance may not be realized, continued Mr. Bennett, but he desired to make it clear that the appropriations passed by the House must not be exceeded.

## Money Awaits Court Ruling

London, England.—Sums of money which the post office department obtained by opening letters sent from England to Ireland for tickets in the Irish hospital sweepstake are being held up, pending a ruling by the British home office on what disposition to make of the currency. The sweepstake is not legal here.

## Will Visit Canada

Washington, D.C.—Sir Ronald Lindsay, the British ambassador will visit Canada during the latter part of April. It is expected Sir Ronald, paying his first semi-official visit to the Dominion, will leave Washington about April 28, to go on to Ottawa, Toronto and Montreal.

## WHAT SHALL I GET OUT OF IT?

(By Rev. Wm. McNichol)

It is said that every man has his price. While I am not prepared to concede the dictum, one is compelled to consider very seriously, as he studies men and their doings, whether there is not more truth than poetry in it after all. How often we hear men, when discussing some financial or business undertaking say: "Well where do I come off at in this?" or "What am I to get out of it?"

Social effect is a very mild term to convey anything like an adequate picture of what has happened behind closed doors, when men have been planning to follow some selfish purpose regardless of any obligation to others, and utterly oblivious of the results of their plans as these reach out to other men and women, to say nothing of innocent little children—Men and women living in comfortable circumstances, who may be reduced almost to beggary if not abject poverty by their proposed action.

Jesus said that "He came not to be ministered unto, but to minister and to give His life a ransom for many." To live actuated by the same principle of loving service by which Jesus was actuated is what it means to be a Christian. Yet today, we meet with many startling proofs of the fact that outstanding leaders, many of them members of our Christian Churches, are not governed by the principle that governed the Nazarine. With Him, the dominant note was service to others. With them, what shall we have therefore, in order to get more for themselves they disregard all obligations to others.

One has not to travel far along life's highway, nor deal much with men entrusted with the property of others, before he comes in contact with men who deliberately use the resources entrusted to them, for their own personal ends, regardless of the welfare of others. Cases are not uncommon where the officers of trusted financial institutions deliberately use for their own personal ends securities which do not belong to them, but to a corporation such as a church, and which had been entrusted to the firm as trustee for that corporation. In one case the president of a banking firm (not Canadian) in conference with other subordinate officials is said to have advocated the right to use for their own benefit, the assets of certain Insurance Companies which they controlled, rather than promote the welfare of those Companies their shareholders and policyholders. The main question was, what shall I get out of it?

The principles which govern life are the real foundations of our social and economic structures; and they are all summed up in the teachings of Jesus Christ, when He said: "Thou shalt love thy neighbor as thyself," and "I came not to be ministered unto, but to minister, and to give my life a ransom for many."

Perhaps we who walk along the lower ways of life are tempted to think that this does not apply to us. That it only applies to large corporations, Oil Stock companies, Stock brokers who fleece the unsuspecting public, and such like. Do not be too sure yourself, gentle reader, are not equally guilty. Perhaps it would be unkind to refer to the last general election in the Dominion of Canada.

QUALITY-PRICE  
BIG VALUE

PATHFINDER  
GOODYEAR

The deep cut, slow wearing, sure traction tread. The live Super-twist carcass—standing up under strain

and rough wear. The price much better than any similar tire. This is the Pathfinder Tread Goodyear. We want you to see it—the big value quality tire that anyone can buy.

See them first—See them now

GARRETT  
MOTORS

— DEALER —

— PHONE: 31 —

There's value, quality and saving in  
Pathfinder tubes.

and the low selfish appeals that were held out as bait, and greedily swallowed by many. How many who read this article have run heavy bills in local stores, bought not only the necessities of life, but often luxuries, and that on credit. Bought also machines to make work easier for yourself or your dependents, and promised to pay as soon as you possibly could, but when you did secure funds that should have gone to the merchant who carried you, you passed him up, and you used that money to invest in oil or copper, or gold or some other project that you imagined would in due time bring in a good return. Your whole thought was what shall I get out of it. You had no thought for your neighbor who carried you.

It is worth remembering that the really great men of all ages never put selfish interests first. They never asked "What shall I get out of it?" Leonidas, as he faced the Persian Horde, never thought of himself. When Columbus subdued the mutiny on board the ship in which he sailed in search of a new world, he did not think what he was to get out of his risk. Lee Shipley points to Washington as a man governed by the highest motives when he sings:  
Had Washington at Valley Forge  
But shown a level business head,  
He might have dealt with Royal George  
And filled with ease the life he led.  
If it be true that each man has  
His price, that was no chance to miss  
But he the wisdom lacked, Alas!

## Governor General's Arrival

Precedent demanding that Lord Bessborough shall become "His Excellency the Governor-General and Commander in Chief" at Halifax where he will be sworn at the historic Province Building, Captain H. Sibbons, R.N.R., commander of the Canadian Pacific liner Duchess of Bedford will divert his vessel from her regular course and call at the Nova Scotian capital to land the vice-regal passenger Easter Saturday. The lay-out shows Lord Bessborough; Lady Bessborough, the former Roberte de Neufville, only French born peeress of Great Britain; Captain Sibbons, one of the most popular captains on the Atlantic and the Duchess of Bedford, 20,000 ton liner—largest Canadian vessel to call at Halifax.

To think, what can I get from this? Many a man has lacked the kind of wisdom Washington lacked, and has suffered for the sake of the generation that followed after. These men did not save themselves. They gave themselves. "Oh men who closely figure out What most directly profits them Gain many things from life, no doubt, But not love's priceless diadem." It is only by self-sacrificing love that man's highest good comes. Outwardly men appear much alike, but if you probe beneath the surface, you will find men gravitating into two groups. One group is dominated by the question, What can I get out of it for myself? The other by the question, what can I put into it for the good of others? True Christians are found only where

their Master is found. "Enduring the Cross, despising the shame," in order that men might be redeemed from the dominance of self, and motivated by the spirit of loving service.

The foreman was very short handed and, seeing a tramp sleeping on the other side of the road, woke him up and said "Look here; do you want any work?"

"What sort of work?" came the sleepy reply.

"Well, could you do anything with this shovel?"

"Yes," said the tramp brightening. "I could fry a nice piece of bacon on it."

## THE DUSTY HIGHWAY

— BY —  
CHRISTINE WHITING  
PARMENTER  
Copyright 1929

CHAPTER XIV.—Continued.

"Shall we go straight home, or would you like to ride for a few miles? It's a splendid day."

Angela laughed.

"How polite and considerate we are all of a sudden! It's a long time since you've asked me to ride with you, my dear."

Her tone was sarcastic, but Halliday refused to take offense, though he did not speak till they had left the town behind and entered a stretch of road that led through the pine woods. He drew a deep breath then, and stopped the car.

"Aren't these pines wonderful? I wish we had a lunch and could stay all day. Would you like to get out and follow that path a way?"

"I certainly should not, in these shoes. They pinch like anything. I never was one to enjoy prowling in the woods, you know."

"There was a time," he began, when with an impatient gesture she interrupted:

"Oh, then! What do you expect of a girl at a time like that? I was merely following your lead—doing the thing I knew would attract you. Did you expect me to keep it up? I can't see that you've continued trying to please me as you did in those days."

"What about this last week?"

He spoke evenly, and she flushed.

"I suppose that's a criticism of my friends. You always do criticize them. I'll have you know that the Myers are worth cultivating. They've got money to burn—oil wells in Oklahoma. They have a magnificent place in Pasadena, and have asked me to visit them next winter; but be-

## CHILDREN CRY FOR IT—

CHILDREN hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and just as harmless as the recipe reads.

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, you should use it to keep the system from clogging.

Castoria is sold in every drugstore; the genuine always bears Chas. H. Fletcher's signature.

**Fletcher's  
CASTORIA**

W. N. U. 1884

cause they don't happen to like the things that you like, I can see that you scorn them."

"Angela," said her husband quietly, "do you enjoy these scenes you so often thrust upon us?"

She shrugged and said: "So the fault is always mine?"

"I'm afraid it is, my dear, for when I unwittingly arouse your anger I am sorry."

"Unwittingly? There've been times when you've goaded me to it!"

"I know. I'm sometimes hateful; but I'm trying to do better. Won't you help?"

She looked at him, puzzled.

"What do you want to get out of me?" she asked.

He sighed, and would have started the car had not she stopped him.

"Look here—if it's about having that child come back to the house you can save your breath. We'll settle it here and now. I hate to look at her. It reminds me of that awful ride in the rain, and how terrible she looked lying across my lap in those dirty, blood-stained clothes. Why her ears weren't even clean, nor her finger nails! I can't forget it. I wouldn't touch her for a hundred dollars. It was ridiculous your bringing her here. As for your sending her to the Hastings', I should think you'd be ashamed to ask a favor of such mere acquaintances."

"I consider them more than acquaintances. I saw a good deal of them while you were gone; but in any case I shouldn't have hesitated to ask a thing like that of Mrs. Hastings. She was glad to do it as I was glad to open my house to the child whom you had hurt."

"Well, she's not hurt now. There's no reason for keeping her any longer."

"There's an excellent reason. You will laugh, I know, but I happen to have grown fond of the little thing."

Genuine surprise lit Angela's face. "You!—fond of that little mongrel? It's laughable. What would your Back Bay mother have thought of that?"

Halliday's eyes gleamed ominously, and his lips tightened.

"Isn't it something new for you to consider my mother's viewpoint on any subject? And I shall ask you not to refer to the little girl in those unpleasant terms."

"Very well; but if you expect me to vacate my room—"

"I don't ask that; but there's an unoccupied guest room, isn't there?"

"And you mean to continue indefinitely paying a trained nurse to look after that impossible child?"

"That won't be necessary much longer. We can get someone else, though Julie is fond of children and would be glad to help when help is needed. Martha does a good deal for herself, though she's such a baby. She hasn't been used to the tender care of the pampered rich."

"And for her own good she'd better not get used to it now," said Angela, her anger rising. "How long, may I ask, do you plan to keep the wail?"

"Always—unless my wife makes it impossible."

"Well, she does."

"In what way?"

"You can choose between us—that's all."

"You don't mean that, Angela."

"I never meant anything more. Why, you'll be adopting her legally next!"

"I had thought of that," Halliday admitted.

"Do you realize what you are saying? You adopt her legally, and at your death she gets the better part of your estate. Do you call that fair—a mere State ward who comes from the very dregs of the earth?"

All the old cynicism was back in

Halliday's face as he replied: "There is no reason to count on my early death, my dear. I come, perhaps unfortunately, of long-lived stock."

"Well, I have told you to choose. If the child comes, I go. That's all."

"No," said Halliday sternly, "that is not all." He faced her, and instinctively she moved away, as if in fear that his words might hurt her physically.

"The child is coming—and you are not going. You will not go because, when you think it over, you will see that by doing so you will gain nothing, and lose much. The name of Halliday shall remain unstained. I did not give it to you lightly, and you shall not cast it aside. Where would you stand in a divorce court should I tell the things I could tell? Answer me that."

Her face grew white.

"You—you wouldn't dare."

"I am no coward, Angela."

"But—I am your wife. You—you wouldn't—"

She raised her eyes, and he saw in them a subtle fear of him that was, he knew, the only weapon he possessed. Yet, as past memories flooded back upon him, he hated that weapon as he had never hated anything in life.

"Angela," he said gently, and his face softened, "Angela—my dear—why have we grown so far apart? If I am different from the man you married, what has made me so? Isn't the love we once had for one another worth fighting to preserve? Won't you try—as I have been trying lately, to—"

He hesitated, but the plea that should have stirred her heart only brought back his wife's lost poise. This was familiar ground—her ground. She laughed and answered, not caring that her words hurt him cruelly: "So you thought that I loved you? Really, Jim, after those hateful yawns you've written I suspected you of more understanding of human-kind—or should I say, my kind?"

"As for this quixotic idea about the child—you will end by doing as you please. You always do. But don't expect any help from me. I won't raise a finger for her. It's fortunate we kept the Boston apartment. I'm tired of Bakersville and everyone connected with it."

"Including me?"

Angela only shrugged.

"Thanks," said Halliday, as his mouth dropped into its cynical lines once more. "In that case there is nothing further to say."

He opened the throttle and turned the car toward home.

(To Be Continued).

Persian Balm is irresistibly appealing to all women who appreciate charm and elegance. Its use keeps the complexion always clear and beautiful. Tonic in effect. Stimulates the skin and makes it wonderfully soft-textured. Softens and whitens the hands. Persian Balm is equally invaluable to men as an excellent hair fixative and cooling shaving lotion. Splendid also to protect the tender skin of the child.

## SELECTED RECIPES

### CORN CHOWDER

2 tablespoons Benson's Corn Starch.  
1 cup hot water.  
1 tablespoon Mazola.  
1 small onion.  
1 cup milk.  
1 cup raw diced potatoes.  
1 cup corn pulp.

Cook the finely chopped onions in the hot water with the potatoes, then add the corn pulp, the "Mazola" and the corn starch dissolved in the cold milk. Cook until the corn starch has thickened. Salt and pepper to taste.

### Made Her Weary

"I'm very tired," said the lady at the head of the supper table one Sunday evening.

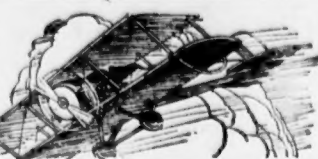

"You should not be," said her minister, who had been asked to the evening meal, "you haven't preached two sermons today."

"No," said the lady, absent-mindedly, "but I listened to them."

### Glass Skyscraper For Berlin

Embodying all the latest modernistic ideas a glass skyscraper is planned for the Potsdamer Platz in Berlin. It will be at least 16 stories in height, and will resemble a glistening circular tower. In contrast, brick wings to the building will be entirely without windows.

## The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

Soon both Scottie and I were sound asleep by our campfire, and after he got those bears off his mind he ceased waking me whenever the blaze went down. Then I began to feel uncomfortably warm. Somehow I choked for breath, and knew I was not comfortable even while partially asleep. Just what the trouble was I could not make out, but I knew that there was something wrong. Scottie then whined and pulled at my sleeve just as I choked and coughed and became fully awake.

For several minutes I could not imagine where I was. My eyes smarted. My throat was parched and even the inside of my nose was irritated. There was the sharp smell of burning wood, and the valley itself was getting thick with smoke. The trees were burning.

When the gas-line tank of the old plane had exploded, burning parts had carried over into the woods and smouldered until they finally burst into flame. The fire was no doubt small at first, but gradually grew and spread until early morning, and while all that was happening, Scottie and I snored peacefully but noisily on. Next time you make a fire in the woods, remember how quickly it can spread even from a spark, and be sure it's all out, even away down in the ground, before you go away.

We were now in a bad fix. To the south the valley narrowed down to a sort of notch between the mountains. To the north it ended in a steep mountain slope. On either side were steep mountain sides that were now lost in the heavy smoke. It became hotter and hotter, and more and more choking and suffocating. Scottie says I "I've heard a lot about dog's luck, and Pup, you'd better get ready to use it because we'll both need plenty of luck before we get out of here. Come! let's go."

By this time the fire seemed to be racing on every side of us. The thick grass of the valley caught fire, towards the notch, and that was the direction in which we had a chance to escape. Heavy brown smoke rolled up from a pasty bog and threatened our only exit.

Hot as it was, I pulled on my leather jacket to protect my back, and my helmet and goggles to save my face and eyes. I snatched up Scottie, and holding him under my coat, started toward the lower end of the valley. The wind fanned the grass fire to furnace heat, and through this we had to go to reach the notch and possibly a stream of water. I turned to back my way through a

wall of flame, and as I did so, Scottie slipped from my grasp and in a flash was out from under my coat. The smoke was so thick that it was scarcely possible to see the length of one's arm. I grasped along toward a muffled noise ahead of me, reached out blindly—and found him. With his hair singed, and badly scared, I bundled him under my coat and ran toward the notch lest the fire should get there first and head us off. But by this time I had pretty well lost all sense of direction. Only by means of the slope of the ground could I tell we were making progress toward the bottom of the valley.

My shoes were smoking, and my feet frightfully hot as we plunged toward. Abruptly we were in the edge of the woods and the ground was steeper and more uneven. All about us the fire burned down on us fiercely, threatening to swoop down on us with a sudden backdraft. For you know, a forest fire always brings a big wind with it. The hot air goes up, while cold air is sucked along the ground, blowing the flames with it. That's why a fire in the woods travels so horribly fast.

Showers of sparks made me dance around lively—pulling the collar of my coat up tight about my neck. I plodded on. Even small stones and roots caused me to stumble and I fairly gasped for breath. From time to time Scottie would whimper like a frightened child.

"Buck up, old chap," I'd say to him. "Just a bit longer. We've got to make it somehow." For a fact, I think he knew. He'd stop and push his head from under my coat and try to lick my hand. You can't tell me a dog doesn't understand.

Then all of a sudden the smoke cleared out of the woods. One could see quite well for a minute. The wind had changed and fanned strongly in the other direction—I raced forward—every second counted—another moment and a seething wall of flame might rush at express train speed across our path.

Then the ground sloped steeply forward. I stubbed my toe in a branch; lunged; caught at thin air—and in an instant we were sliding down a fiercely burning gulch.

Down, down we went. I grasped a tree root—it burned through and came away in my hand. Then we shot out over a ledge into space. We were falling. What was that below? We were falling.

(To Be Continued).

## Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

### Some Of Tallest Men

#### Biggest One In Twentieth Century Was A Russian

"In the Bible we read that the bedstead of Og, king of Bashan, was about sixteen and one-half feet long; he lived 1451 B.C., records Charles Duff (in "This Human Nature.") "Goliath of Gath—who was killed in a duel with David—was not far off ten feet in height. Pliny tells us, "The tallest man that hath been seen in our age was one named Gabara, who, in the days of Claudius was brought out of Arabia; he was nearly ten feet high." The biggest man in the twentieth century was Machnow, the Russian, who at the age of twenty-three years, was nine feet eight inches, and weighed 448 pounds."

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Money from the sugar and tea monopoly fund in Persia is being used for highway improvement.

### Little Helps For This Week

"The Lord redeemeth the soul of His servants; and none of them that trust in Him shall be desolate." — Psalm xxxiv. 22.

And so beside the silent sea,  
I wait the muffled oar;  
No harm from Him can come to me,  
On ocean or on shore.

I know not where His islands lift  
Their fringed palms in air;  
I only know I cannot drift  
Beyond His love and care.

—John Greenleaf Whittier.

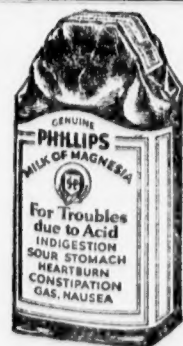

To trust is the longest step Godward that any of us can take. We cannot by searching find out God; we can only put ourselves where God can come to us. He who trusts, who believes, knows God.

—Theodore T. Munger.

The joke writer has a funny way of making a living.

Lead poisoning in English factories is being overcome.

## ACID causes Headaches

When there's too much acid in your stomach, you must force yourself to work, and even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet your way out of the trouble!

Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid instantly; make you feel like a new person in just a few moments.

(Made in Canada)

Take a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. Whenever you are taking cold or feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle, laxative action.

Delightful to take. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. It always bears the name Phillips for your protection.
